SEQRA SERVICES

INTRODUCTION TO SEQRA

PWGC has extensive experience with the process and requirements of the New York State Environmental Quality Review Act (SEQRA), as well as related local, state and federal permitting.

PWGC provides environmental and land use consulting services for projects subject to local, state and/or federal environmental and land use regulations. PWGC can assist clients in the early stages of project planning by identifying potential environmental and land use constraints or sensitivities. All of PWGC's SEQRA work is led by Vice President Kim Gennaro-Oancea, MS, AICP CEP who has decades of experience providing these services.

PWGC works with technical specialists to create plans that comply with the environmental and land use regulations, and are consistent with community goals.

PWGC SERVICES

- Preparation of environmental assessments, environmental impact statements, determinations of significance, and related documents/analyses.
- Permitting and compliance services – federal- and state-regulated wetlands and adjacent areas, floodplain development, coastal management zones, other designated critical environmental areas, and historic resources/Section 14.09 compliance
- Land use and zoning assessments.
- Expert testimony and public presentations.

MARKETS SERVED

Public School Districts and Libraries

PWGC assists Boards with the administration and management of the SEQRA process, prepares the requisite environmental analyses and environmental permit applications for construction and alteration projects, coordinates with interested and involved agencies, and participates in public meetings.

Municipalities and Special Districts

As the environmental and planning consultant, PWGC reviews and prepares environmental and planning-related documents, determinations and notices. PWGC also assists with the administration of the SEQRA process for the lead and involved agencies, and participates at public meetings or hearings.

Retail, Commercial, Educational and Residential Applications

PWGC assists in the preliminary planning phase of all projects, prepares environmental assessments, environmental impact statements and related documents, as well as assists with obtaining required permits.

An aerial photograph of a large-scale construction project. The site is filled with various construction materials, including stacks of orange bricks and wooden formwork. Several tall yellow tower cranes are positioned around the site, some with their jibs extending over the buildings under construction. The ground is a mix of dirt, concrete, and rebar. In the background, there are some residential buildings and a road with a few cars. The overall scene is one of active construction.
